

Residential Windowsill Specifications

Manstone has been Colorado's leading producer of custom shower bases, wall surrounds, vanity tops, and windowsills for residential projects since 1972. Having serviced the residential construction industry for many years, we fully understand the importance of both quality and cost. Our materials and workmanship are of superior quality, and our competitive pricing offers our customers affordable luxury, elegance, and ease of maintenance.

Custom Engineered Marble Windowsills

Engineered marble windowsills are impervious to moisture and condensation and require no paint or sealant. They also hold up incredibly well to heat and U.V. rays that transmit through windows.

Maintenance and Cleaning

Care and cleaning of engineered marble:

- For everyday cleaning, use a mild liquid detergent and warm water.
- A non-abrasive cream polish (such as Gel Gloss) can be used to maintain the elegant finish.
- Do not use abrasive cleansers, polishes, or cleaning tools, as those will scratch the surface.

Color and Sizing Information

Standard Colors: SOLID WHITE or SOLID BEIGE

Maximum length size is 120".

Three standard depth sizes:

- 5-1/4" overall (4-1/2" behind lip)
- 7-1/2" overall (6-3/4" behind lip)
- 14" overall (13-1/4" behind lip)

Customization:

- Surcharge (per sill) will apply to cut sills to custom depths
- Surcharge (per sill) will apply to cut "dog ears" to wrap in front of wall

Residential windowsill orders are pickup only – Manstone will not provide installation for residential sills.
